The First Century of Astronomical Spectroscopy	
Introduction <i>Joseph S. Tenn</i>	88
Auguste Comte's Blunder: An Account of the First Century of Stellar Spectroscopy and How it Took One Hundred Years to Prove that Comte Was Wrong! <i>John Hearnshaw</i>	90
Spectroscopy—So What? <i>Matthew Stanley</i>	105
From Dilettante to Serious Amateur: William Huggins' Move into the Inner Circle <i>Barbara J. Becker</i>	112
The Origin and Diffusion of the H and K Notation <i>Jay M. Pasachoff and Terry-Ann Suer</i>	120
The 1910 Solar Conference and Cooperation in Stellar Spectroscopy <i>Richard A. Jarrell</i>	127
Extraordinary Claims Require Extraordinary Evidence: C.H. Payne, H.N. Russell and Standards of Evidence in Early Quantitative Stellar Spectroscopy <i>David H. DeVorkin</i>	139
Charlotte Moore Sitterly <i>Vera C. Rubin</i>	145
Other Papers	
St. Helena, Edmond Halley, the Discovery of Stellar Proper Motion, and the Mystery of Aldebaran <i>John C. Brandtq</i>	149
The First Astronomical Hypothesis Based on Cinematographical Observations: Costa Lobo's 1912 Evidence for Polar Flattening of the Moon <i>Vitor Bonifácio, Isabel Malaquias and João Fernandes</i>	159
Book Reviews	
<i>Blick zurück ins Universum. Die Geschichte der österreichischen Astronomie in Biografien</i> , by Daniela Angetter and Nora Pärri <i>Hilmar W. Duerbeck</i>	169
<i>Jérôme Lalande (1732-1807). Une Trajectoire Scientifique</i> , edited by Guy Boistel, Jérôme Lamy and Colette Le Lay <i>James Lequeux</i>	169
